

Strawberry Rhubarb Vodka

INGREDIENTS:

- 1 1/2 cups strawberries, quartered
- 1 1/2 cups rhubarb, chopped
- 375 ml vodka

DIRECTIONS:

1. Place the strawberries and rhubarb in large jar (or a few small ones) and pour vodka over them. Put a lid on the jar and place in a cool dark place. Leave it in there for 3-5 days, agitating the jar a few times a day.
2. Pour vodka through a fine mesh strainer (to catch the berries). Store in the fridge until time to serve.
